

Spencer Forrester  
Lamberton Middle School, 6W

Here is a link to my Martin Luther King, Jr. project. I wrote a program to express my ideas of how Carlisle is working towards a Beloved Community, making it "Our Beloved Community". I used the Scratch programming language to build my project. You will need to follow the prompts on each screen of my project to view the entire thing.

I used the prompt question "Where in your community do you see evidence of individuals or groups striving to achieve 'The Beloved Community'?" when I considered what my project should be about. The project shows how different organizations in Carlisle are helping to beat hunger, poverty, homelessness, conflict and racism. I also added information about the work of Dr. King as you said.

I also added in some introduction at the beginning of the project so that the Beloved community is explained better.
